3. Repeat as, or if, Needed

Air Tubes can be set up any way you like, or make your own with Standard PVC Pipe.

## The Best Solution for Drying Waterborne & Water Based Finishes

Compressed air handheld or stationary dryers use large amounts of compressed air, up to 10 cfm per venturi, they are inefficient and can pass contaminants onto the panel just painted. With the Turbo-Dryer/Sprayer Combo you have the benefit of heated, dry, clean, oil-free air to dry the panel in a fraction of the time than compressed air. The turbine heats the air up to 60° F over ambient air and is filtered to 3 microns. Dryer Air Tubes are made from off the shelf PVC, inexpensive to replace or you can create your own custom set-up. The Air Tubes have 3/8" holes every 3 - 4 inches.

**Pro-Series "TA" Spray Gun** (included with Combo Package above)

- Top Feed in 4 cup sizes; 3 oz, 8 oz (shown), 21 oz & 32 oz
  - Features all metal construction (except for Nylon cup)
  - Exclusive Patented Floating Gasket plate for leak proof performance
- \$430 as shown with 8 oz Cup

# Lex-Aire Mobile HVLP Turbine Systems

LEX-AIRE Turbine systems are ideal for mobile businesses.

Lex-Aire equipment is the finest in the industry.

They are lightweight, quiet, and easy to set up.

The units present a professional, high-tech, appearance to your customers.

All you need is access to a 110 volt outlet.

The turbine provides an instant continuous air supply.

There is no need to wait for a compressor to build up pressure, nor is there the fluctuation in air pressure.

Lex-Aire Spray Systems are used by mobile professionals in providing on site automotive touch-ups, panel painting, interior repairs and wheel refinishing.

The high quality Pro-Series Gun provides an even finish, without mottling of base coats.

The Combo package Turbo-Dryer gives you heated air in cooler weather to speed up drying.

LEX-AIRE COMPACT SERIES TURBINES feature a heavy duty cabinet designed to stand up to years of professional use. The inside of the cabinet is acoustic foam lined for noise reduction. The motor mount forms a plenum chamber which isolates clean incoming air from the exhaust cooling air. All incoming air is drawn through a 3 micron washable main filter with 13 square feet of effective filter area that is 99.9% efficient. In addition the LX-60C also feature a washable foam pre-filter. This is the most advanced filtering system on the market for blemish free finishes and long motor life. Every Lex-Aire turbine system is packaged in a sturdy well designed shipping carton.

Lex-Aire has the only Combination Spray and Dry Package for Water Based Finishes. This increases productivity and profit. The high volume of warm, dry air is the fastest way to flash off (dehydrate) Water Based.

Lex-Aire meets all HVLP requirements. Three Ounce Cup available for EPA Rule.

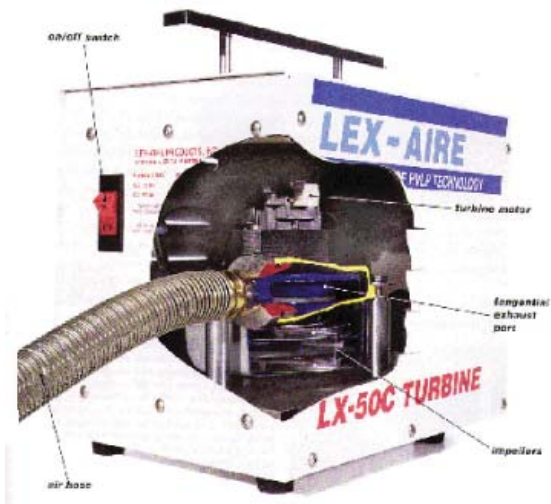

LEX-AIRE has the highest quality, best made components in the industry.
